DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 5, 6, 9, 10, 12-14, and 16-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Shaver 5,996,870.

Shaver teaches a bicycle carrier comprising an elongated tray/support rail 34, secured 35, 40, to an equipment rack/article carrier 12, a foldable wheel support 36, a frame engaging assembly 38 operable associated with the support rail via the wheel support, tubes 70 and a clamp 88.

Allowable Subject Matter

3. Claims 4, 7, 8, 11 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The following is a statement of reasons for the indication of allowable subject matter: The previously applied prior art of Graber et al. fails to meet the claimed limitation of the foldable wheel support supporting substantially the entire weight of the bicycle in a substantially vertical orientation. The currently applied prior art of Shaver fails to teach the structural features set forth in objected to claims.

Response to Arguments

5. Applicant's arguments filed October 27, 2003 have been fully considered but they are not persuasive. In response to applicants arguments directed to the prior art of Shaver not teaching "an elongated support rail fixedly secured to an article carrier structure", the "tray" of Shaver is structurally identical to the "support rail" claimed by applicant. See in particular figures 2 and 3 of Shaver. The "trailer hitch" of Shaver is not identified as the structure that equates to applicants claimed "article carrier". The "equipment rack 12" of Shaver has been identified as the corresponding structure that meets applicants claimed limitation of an "article carrier". See column 3 lines 9-27.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
